Purpose

The Revenue and Financing policy is adopted under Sections 102(1) & 103(1) of the Local Government Act and must contain the Council's general policies on the funding of operating and capital expenditure and show how the local authority has, in relation to the sources of funding identified in the policy, complied with Section 101(3) which has two parts.

Policy Background

Napier City Council (the Council) has reviewed the proposed sources of funding for operating and capital expenditure and has reviewed the funding for each activity to determine the funding policy for each. In accordance with the Local Government Act 2002 (LGA) Council has considered each activity with regard to the following:

- Community outcomes to which an activity contributes; and
- the distribution of the benefits between the community as a whole, identifiable parts of the community and individuals; and
- the period in or over which those benefits are expected to occur; and;
- the extent to which actions or inactions of individuals or groups contribute to the activity; and
- costs and benefits of funding the activity distinctly from other activities.

Council has considered each activity to determine what it considers an appropriate funding source for both operating and capital expenditure (refer the schedule in the appendix).

Then it has considered the overall impact of any allocation of liability for revenue needs on the current and future social, economic, environmental, and cultural wellbeing of the community. It considered the following in determining the final funding source:

- The nature of Napier City as a whole including as a visitor and tourist destination.
- The different costs of providing services and facilities and the associated benefits that the commercial (including accommodation providers) and industrial properties receive from those services.

- The impact of rates on residential properties, and in particular on the affordability of rates for low, average and fixed income households.
- The General Rate has a significant component of public good or activities when the community benefits as a whole, and as the General Rate is a general taxing mechanism shifting the “differential factor” for each sector’s share of the city’s overall land value is the principal means that the Council has used to of achieving the desired overall rates impact on the wider community. It cannot achieve precise equity or allocation of costs to each type of property.
- The complexity of the rating system and the desirability of improving administrative simplicity.

Council has concluded that the general rate and storm water targeted rate on commercial and industrial should have an appropriate differential recognising the issues considered above.

Council has also considered the impact of fees and charges. Council uses the market rate (where permissible) as the upper limit used for determining fees or charges. Where Council believes the imposition of fees or charges at a rate above the market rate will reduce usage of the activity or facility and lead to the imposition of a greater cost on ratepayers it will modify the amount chargeable to the market rate. In selecting the market rate, the Council has made a judgement that the community values the existence of the facility and would rather fund it from rates than for the facility to close.

Following consideration of the above the Council is proposing the use of the following funding tools

Council’s policies on funding operating expenses and capital expenditure

General Rates

General Rates are used to fund both operating and capital expenditure. They fund the remaining costs of Council operations after all other sources of funding have been applied.

General Rates are assessed through a combination of a Uniform Annual General Charge (UAGC) and a rate in the dollar based on land value.

Council is proposing the following land value differential categories:

- Residential
- Rural
- Commercial & Industrial

The amount of the UAGC is set to ensure that the total (excluding water and wastewater rates) uniform (or fixed) rates will be between 20% to 25% of total rates that are to be collected.

Differential rating category definitions

Residential and Other properties

Any property that is not defined as Commercial & Industrial, or Rural.

Commercial and Industrial

Any property that is in a commercial or industrial zone under the District Plan or used for any business activities, except properties categorised as rural, will be rated as commercial and industrial properties.

Commercial and industrial activities include, but are not restricted solely to:

- Rural and other support activities such as transport, supplies, packhouses and wineries servicing multiple clients
- Professional offices, surgeries etc.
- All retail, wholesale merchandising activities
- All forms of manufacturing and processing
- Bars, restaurants, cafes and other service activities
- Storage facilities
- Hotels, motels, B & B's and other short-term accommodation providers
- Tourism operations
- Care facilities operated for profit

Rural

Any rating unit with an area of 5 Hectares or more that is used predominantly for land based agricultural or farming activities and the value of improvements does not exceed the value of the land.

Targeted Rates for specific areas and/or activities

Targeted Rates are charged to fund both operating and capital expenditure. They are charged where Council considers it desirable to separate out the funding of an activity. They are charged to rating units including those units that are separately inhabited which have access to or are deemed to benefit from the service provided. Targeted rates are a funding mechanism that may be charged for activities deemed to have either a high public or a high private good to identified properties, an area of the city or the city as a whole.

Some targeted rates are applied differentially using either land or capital values, however most targeted rates are applied on a uniform basis (same amount or rate in the dollar).

Lump sum contributions

Council does not normally use any lump sum contributions.

Fees and charges:

Fees and charges are used to fund both operating and capital expenditure.

They are applied where there is a benefit to an individual from the delivery of goods and or services and this can be charged in a cost-efficient manner. If it is possible to efficiently impose a charge, then the Council does so, on the basis of either recovering the full cost of the service, the marginal cost added by users, or at a level that the market will pay. Fees & charges includes retail sales, ticketing, & corporate sponsorship

The following specific types of revenue are included in fees and charges:

- Licence Fees

Licence fees are charged where applicable and may be set by Council or by regulation.

- Enforcement Fees including fines and infringement fees

Enforcement fees are charged where applicable. Their purpose is to promote compliance rather than to raise revenue; consequently, revenue collected may be insufficient to meet the full costs of the

enforcement activity. The level of enforcement fee may also be restricted by statute or the courts. Use of enforcement fee revenue collected may also be directed to a specific purpose by statute.

- **Rental and Lease Income**

Rental and lease income are attributed to the activity with primary responsibility for the asset generating the rental or lease income. This revenue generally offsets costs of maintaining the asset and costs generally within the activity area receiving the revenue. However, in the case of leasehold land subject to the Hawke's Bay Endowment Land Empowering Act 2002, ground rental revenue is credited to a special fund within equity being the HBHB Endowment Income Account. In accordance with the Act this income is used to fund the net cost of the Napier Inner Harbour and certain foreshore reserves and other permitted activities. The land subject to the Act was vested in Council in 1989 from the Hawke's Bay Harbour Board at the same time that Council assumed liability for the Napier Inner Harbour and former Harbour Board foreshore reserves.

- **Waste Levy Income**

This is the Council share of waste levy fees collected by the Ministry for the Environment. Income is received from the Waste Levy Fund and must be applied to waste minimisation activities.

Interest and dividends from investments

Interest and dividends from investments are used to fund operating and capital expenditure.

Council receives interest from its investments. Interest generated from defined funds held or collected, where Council has determined that interest will be added, are credited to the fund at year end and applied to the purposes of the fund. Any remaining interest income is used to reduce the requirement for General Rates.

Council also receives a minor amount of dividend revenue from time to time. Where applicable, this is applied to offset the cost of the activity related to the dividend income. Where dividend income relates to Council operations in general, this is applied to the same purposes as general rates.

Borrowing

Borrowing is primarily used as a tool to smooth cash requirements for capital acquisitions and replacements, and can be used to smooth cash requirements for large one-off operating expenditure. In certain circumstances, in accordance with Council's financial strategy, borrowing may be used to fund operating expenditure.

Proceeds from Asset Sales

Proceeds from asset sales are used to fund operating and capital expenditure.

Council's preference is that proceeds from asset sales are used to fund capital projects, repay debt to external parties or repay internal debt, thus replenishing reserves. The main planned asset sales programme of Council is the ongoing freeholding of HBHB Endowment Land Residential Leases and the sale of land associated with the development and sale of sections in the Parklands residential subdivision. Council also intends to review assets for potential sale to reduce debt or replace with higher yielding investments.

Development and Financial Contributions

Proceeds from development and financial contributions are used to fund operating and capital expenditure. They are primarily to fund capital expenditure associated with growth however some operating costs such as finance costs may be funded from this source.

The existing Development Contribution policy has had limited application and as the Council has an operative Financial Contributions policy under the Resource Management Act 1991, it was decided that this was currently the preferred method of recovery of the costs relating to development. The Financial Contributions Policy will be updated as part of the review of the District Plan.

Grants, subsidies and donations

Revenue from these sources is actively sought to offset both operating and capital costs.

Petrol Tax

This is the local government share of the petrol tax levied by central government. It is used to contribute to the costs of road maintenance.

Other funding sources

Council continues to actively explore all possible sources of funding to assist with the funding of both operating and capital expenditure. Any other funds derived will be used to either fund capital expenditure or to reduce the amount Council collects from rates.

Council policies in relation to various funding sources to fund operating and capital expenditure (section 103 Local Government Act 2002)

The table sets out for each activity funding sources that are to be used for both operating and capital expenditure. The rationale is explained in schedule in the appendix.

Activity	Funding sources	
	Operational ²	Capital
Animal control	Primary source: <ul style="list-style-type: none">• Fees & charges (including infringement fees) 65% to 70% Other sources: <ul style="list-style-type: none">• General rates	<ul style="list-style-type: none">• Accumulated surpluses from General rates, fees & charges,• Loans• Reserves
Bay Skate	Primary source: <ul style="list-style-type: none">• General rates 60% - 70% Other sources; <ul style="list-style-type: none">• Fees and charges (including Leases, retail sales, & sponsorship)	<ul style="list-style-type: none">• Accumulated surpluses from General rates, fees & charges,• Loans• Reserves
Building consents	Primary source: <ul style="list-style-type: none">• Fees and charges 80% Other sources: <ul style="list-style-type: none">• General rates• Targeted rates	Nil

² The stated percentages indicate the target set by Council. The actual percentages will vary from year to year as explained in the footnote at the bottom of the table in the appendix. Also subsidies, grants and donations can be considered as a possible source of funding for all activities as Council will actively seek other sources of external funding where available for both operating and capital expenditure.

The schedule in the appendix records how the Council has applied the five considerations in the table below that it must consider when undertaking its funding needs analysis.

Local Government Act 2002 section	Areas of consideration	Description of the matter Council might consider
s.101(3)(a)(i)	Community outcome	The Council determined which of its community outcomes each activity primarily contributes to. There may not be strong link between community outcomes and funding requirements for an activity
s.101(3)(a)(ii)	Who benefits?	What the distribution of benefits is between the whole community, identifiable parts of the community and individuals. Often referred to as the public/private good split.
s.101(3)(a)(iii)	Period of benefit	For most operational expenses, the benefit is received in the year the expense is incurred. Some operational expenses (provisions) may have a benefit over multiple years and so the Council may choose to fund the activity over that period. Expenditure which results in an asset either being replaced (renewals) or new assets provide benefit over multiple years.
s.101(3)(a)(iv)	Whose acts create a need	Council used the principle that those who cause additional cost either by action or inaction are considered in this section. These may be different groups from those who have been identified within the "who benefits" consideration above. Often referred to as the exacerbator pays principle
s.101(3)(a)(v)	Separate funding	Council considered the costs and benefits of funding an activity separately, including in relation to transparency and accountability. It also considered matters such as the financial scale of the activity, administrative cost, and legal requirements.

Appendix A

Schedule of Activity Funding Needs Analysis Section 101(3)(a) LGA

Activity	Community outcome	Who benefits?	Period of benefit	Whose acts create a need	Separate funding	Rationale	To be recovered from Public Good tools ³	Funding sources	
								Operational	Capital
Animal control	A safe and healthy city that supports community well-being	Community as a whole Animal owners	Intergenerational	All animal owners create the need however irresponsible owners create a greater cost. Legislative (Dog Control Act)	No reason identified to fund the net cost of this activity (after non rate revenue sources) separately from other activities. The private benefit is predominantly funded from annual dog licence fees.	Animal control is primarily a health & safety service for the community & therefore benefits everyone. There are costs that the Council can directly attribute to individual owners.	30% - 35%	<ul style="list-style-type: none"> • General rates • Fees & charges (including infringement fees) 	<ul style="list-style-type: none"> • Accumulated surpluses from General rates, fees & charges, • Loans • Reserves
Bay Skate	A vibrant innovative	Direct users, local businesses,	Intergenerational	Nil	No reason identified to fund the net	Everyone has the ability to use the facility	60% - 70%	<ul style="list-style-type: none"> • General rates 	<ul style="list-style-type: none"> • Accumulated surpluses from General rates,

³ The percentages stated are the indicative target set by Council. The actual percentage may vary from year to year based on activity levels. As an example, an activity that says 100% public good may receive some revenue from fees and charges where charging is warranted to ensure the community are not inadvertently required to pay for something that only provides a benefit to an identifiable individual. Another example where the actual percentage may vary is when Council is able to obtain external grants or subsidies for a specific programme of work.

	city for everyone	parents, tourists and visitors Community as a whole as the facility provides a safe location for users to undertake their sport			cost of this activity (after non rate revenue sources) separately from other activities	and Council can identify the users		<ul style="list-style-type: none"> • Fees and charges (including Leases, retail sales, & sponsorship) 	fees & charges, <ul style="list-style-type: none"> • Loans • Reserves
Building consents	A safe and healthy city that supports community well-being	The property owner and inhabitant. There is a wider benefit from buildings being built to code	Intergenerational because of the life of the structures for which consents are issued.	People constructing non consented buildings, construction industry parties not complying with the Building Act	Council funds the cost of inspecting and maintaining a database on swimming pools through a target rate to properties that have a swimming pool. No reason identified to fund the net cost of this activity (after the swimming pool targeted rate and	This benefits the property owner and inhabitant.
