

OUR PRIORITY AREAS

Our Long Term Plan 2021-31 reconfirmed our long-term strategic vision for the city: A vibrant and sustainable city for all.

Our priorities for the 2022/23 year are:

WATER: water remains our number one priority. We're working to resolve colour and taste issues with our drinking water, ensure our stormwater network can manage severe weather events, lessen environmental effects of stormwater discharge into the Ahuriri Estuary, and address aging elements of our wastewater network.

SAFETY: we know that people are feeling less safe out and about than they used to and our focus is making sure everyone can confidently enjoy our public places.

CLIMATE CHANGE: we're exploring ways to enhance our resilience in the face of climate change.

ECONOMIC DEVELOPMENT: we're focussed on using our influence and resources to advocate for a strong Napier economy.

PLANNING FOR GROWTH: we're reviewing our District Plan to enable economic and residential growth, while protecting the things that make Napier special.

Below, we've identified specific initiatives we're going to deliver over the year within each of our activity groups.

Stormwater Reticulation Replacements

- CCTV inspections following November 2020 flooding identified urgent renewals needed at various places across the city, which are now the focus for upgrades and replacements.

Shallow Groundwater Bore monitoring

- Napier City Council has 18 shallow groundwater bores around the city which allow the monitoring of levels and conductivity of shallow groundwater tables. GNS Science has an interest in understanding Napier City's shallow groundwater behaviour for liquefaction purposes. This project will see monitoring used to support liquefaction risk assessments, and to understand the connectivity of shallow groundwater to Napier's urban waterways.

CCTV stormwater inspections

- CCTV cameras will be used for condition assessments on stormwater pipes to inform a proactive renewal programme.

Tennyson St Outfall Improvements

- This outfall requires urgent improvement so it can be accessed for maintenance and inspection (necessary for resource consent condition reporting). Inspections required in the 20/21 year could not be completed due to difficulties in accessing the structure and health and safety concerns.

- With the new 'Drinking Water Standards' set to be adopted, we need to progress with identifying new bore field locations (with space for treatment plants) to meet compliance requirements.

Te Awa Watermain Extension - Philips-Awatoto Rd

Mataruahou (Napier Hill) Reservoir

- The Enfield Reservoir needs to be replaced with a new reservoir with a capacity of at least 20 ML to cater for projected growth and to maintain the level of service to Napier City. The old Enfield Reservoir is not designed or configured to meet current standards or enable the appropriate management of water quality and safety as outlined in Council's Water Safety Plan.
- In 2022/23, we will select the site for the reservoir on the Mataruahou land, and design and begin construction on the above ground reservoir.
